

What do we do as an association?

Our association members are ranging from Start-Ups and SMB suppliers to automobile producers. Together they describe and create the foundations for the data ecosystem.

- Collaborating in task forces and committees our members are creating **technical standards for the operation, software offerings and applications as well as certification criteria for operating companies and providers.**
- As an association we are facilitating and coordinating **development cooperations:** Based on concrete use cases, these cooperations, consortiums and projects are creating solutions that can be standard candidates for the data ecosystem. Thereby we are building the foundation for **Shared Services.**
- Moreover, the association is bundling **information offers and qualification offers** for the Catena-X data ecosystem.
- As an association we are coordinating a growing network of companies and partnerships with federations and implementation partners on **a global scale.**

How everything started

2020: A set of pioneering companies initiated the Catena-X Automotive Network.

December 2020: The German government first announced the network on the Digitalgipfel.

May 2021: The association Catena-X Automotive Network e.V. was founded as a legal organization and carrier of the brand Catena-X. Here you can find further information on the history and the status-quo.

Oliver Ganser

Chairman of the Board of Catena-X Automotive Network e.V. and Head of the Catena-X Consortium
